PART I: Layout Plans of Ranchore Line Quarter

The boundaries of Ranchore Line Quarter lie between M.A. Jinnah (Bunder) Road on the south-east, Jamila (Barnes) Street on the north-east. Pir Illahi Bux (Lawrence) Road on north-west and Baba-e-Urdu Road on south-west. The total number of listed heritage buildings in Ranchore Line Quarter is 29. During the resurvey 160 more buildings have been identified as worthy of preservation and hereby proposed for being declared as protected heritage property. Thus in all the total number of listed properties in this quarter will become 189 buildings, out of a total of 667 plus, plot parcels demarcated in the 12 survey sheets of Ranchore Line Quarter, as per record of the KBCA, Which is less than 28% of the total plots within this quarter.

The set of layout plans for Ranchore Line Quarter include essential information such building heights, occupancy, ownership, usage, present status, degree of threat and the degree of value. These layouts are produced in two complete but separate sets; one for the listed buildings and the other for newly identified buildings proposed for enlistment, in order to avoid any confusion. Following is a description of each of the layouts for the listed properties. Similar set of layouts for newly identified buildings is also attached, which shows the relevant percentages on the layouts.

Location of Ranchore Line Quarter

KARACHI HERITAGE BUILDINGS RESURVEY PROJECT

1. Key Plan: (layout RAN -1)

Key plan which shows both listed and newly identified buildings together but in different colors. Two separate key plans are also developed one to show buildings that are already enlisted as protected heritage buildings, and the second to show only newly identified buildings that are being proposed for enlistment.

2. Key Plan: (layout RAN -2)

The key plan for Ranchore Line Quarter shows the boundary and limits of this quarter marking all the listed heritage properties on it giving each one of them a number which corresponds to the numeric ID given to each building in the database.

3. Building Heights: (layout RAN-3)

The information on building heights within Ranchore Line Quarter indicates that the heights of all historic buildings range between ground to ground plus four storeys at the most. The percentages of specific building heights shows that the listed historic buildings in Ranchore Line Quarter predominantly fall within the category of ground plus one (G+1) and ground plus two (G+2) storeys i.e. 30% and 40% respectively. A substantial number of historic buildings i.e. 19% have ground plus three (G+3). Whereas the percentage of buildings having ground (G) and ground plus four (G+4) is very small i.e. 7% and 4% respectively. These calculations are based on the building heights of the twenty nine historic buildings that are already enlisted as protected heritage.

4. Occupancy: (layout RAN -4)

The occupancy pattern of historic buildings in Ranchore Line Quarter indicates that most of the buildings are either lived in by the owners themselves or they are rented out. The percentage indicates that 62% of the historic buildings are occupied by their owners themselves, whereas 15% buildings are rented 23% are occupied on pugree basis. These calculations do not include the three listed buildings that have been demolished.

5. Ownership: (layout RAN -5)

The ownership of historic buildings broadly falls under four categories; private-single, private-multiple, government-provincial and trust buildings The highest percentage is of privately owned buildings, within which 38% are owned by single owners and 12% have a multiple ownership. Among government buildings, 38% belong to the provincial government. A small percentage of buildings, i.e. 12% of the listed buildings are trust properties, including properties of the Sir Abdullah Haroon Trust, Haji Mohammad Mauladina Dharamsa'a (Musafir Khana) and Jamaat Khana Trust. The three listed buildings that have already been demolished are not included in these calculations.

KARACHI HERITAGE BUILDINGS RESURVEY PROJECT

6. Building Usage: (layout RAN -6a-e)

The listed properties within Ranchore Line Quarter are being used for commercial, residential, warehousing and other purposes. The usage of buildings has been determined separately for each floor. The results show that on the ground floor the usage is predominantly commercial, with 45% of the buildings having shops and other commercial establishments, Whereas 12% are used for warehousing purpose, 4% are lying vacant and 8% of buildings are used for residential purpose The remaining 31% are in other usages including educational (schools and colleges), health (clinics and hospitals) and religious (mosques) facilities.

Usage on the first floor shows 62% of buildings are used for residential purpose. Whereas 4% are used for commercial purpose, 4% are lying vacant and other 30% are in other usages including educational (schools and colleges), and religious (mosques).

Usage on the second floor shows the highest percentage i.e. 81% of buildings are used for residential purpose and other 19% are in other usage including educational (schools), and religious (mosques).

There are five buildings up to 3rd floor and only one building is up to 4th floor, all being used for residential purpose.

The number of buildings included in calculations for each level incorporates ones that go only up to that level. Remaining buildings are deducted from the total number for each consecutive level. The three demolished buildings are not included in these calculations.

% Present Status: (layout RAN -7)

The present status of listed heritage properties shows the state of maintenance or disrepair of these buildings. From a total of 29 listed buildings three have already been demolished, i.e. 10% of the total buildings. The present status of the plots shows all plots with demolished buildings have been built upon.

Almost 14% of the listed properties are in a state of partial demolition, where either part of the building façade or portion of the roof or upper storeys, have collapsed.

A fairly large number of buildings, i.e. 55% are in the category of partially maintained buildings, where the structure of the building is completely intact but the maintenance is not properly done. Such cases might have large hoardings or sign boards that cover the façade, heavy alterations that deface the buildings, or inconsistent external appearance due to haphazard changes in different portions of the building.

Only 21% of the buildings were found to be in a well maintained condition, meaning that they have a homogenous outer appearance, and the original façade is largely maintained in its true state.

8. Degree of Threat: (layout RAN -8)

The degree of threat for historic buildings has evolved through an analysis and correlation of information developed in the database. There is a large percentage of buildings in the Ranchore Line Quarter for which the degree of threat level in terms of their survival is considered very high. The buildings placed in the category of 'High Degree Threat' are the ones which are already partially demolished, or only their façade is remaining, or which are completely or 50% and more abandoned and left to decay. Almost 19% of the listed buildings have been identified under this category.

The buildings identified under 'Second Degree Threat' level are the ones which are partially maintained, indicating haphazaro and defacing alterations, and also have a portion/s (less than 50%) of the building which is not being used, thus not maintained. Remaining 23% buildings are identified as properties which are well maintained and in a good state of conservation.

9. Degree of Value: (layout RAN-9) These also include buildings which are occupied only on the ground floor and are

The degree of value for each listed property has been evaluated through ore-developed criteria which include its architectural features, its historic significance, historic association, its group value and its location value. Through these basic parameters each building is evaluated and according to the points it receives it is placed in one of the three degrees of value.

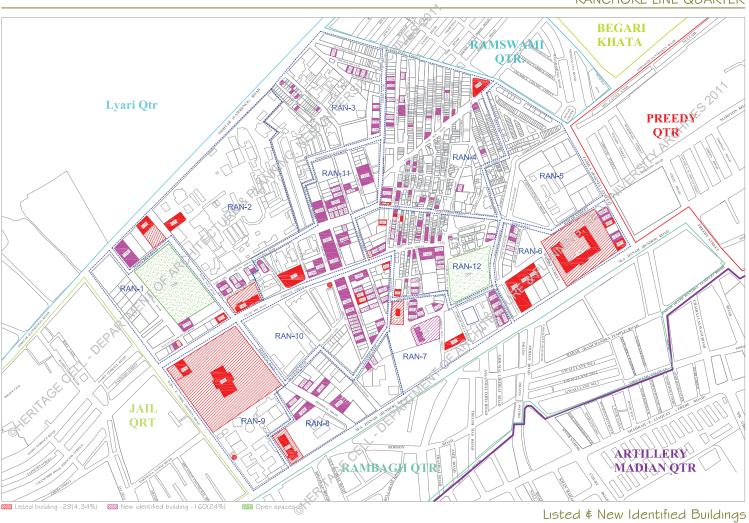

Four buildings in Ranchore Line Quarter have the 'first degree value' (between 150-90 points) making only 10% of listed properties. These includes monumental buildings such as the N. J. V. High School (Old Sindh Assembly), Chulam Hoosain Khalikdina Hall & Library and the Civil Hospital.

The buildings that come under the 'second degree value' (between 89-70 points), make almost 28% of the listed buildings. These include buildings which have extensive architectural details and rich stone carvings, as well as the ones having typical plan typology and layout characteristics of the historic buildings.

A majority of the buildings come under the 'third degree value' (between 69-50 points), i.e. 52% of the listed buildings. This group includes buildings that may not have extensive or elaborate architectural features, but may be important in adding group value to the fabric or area.

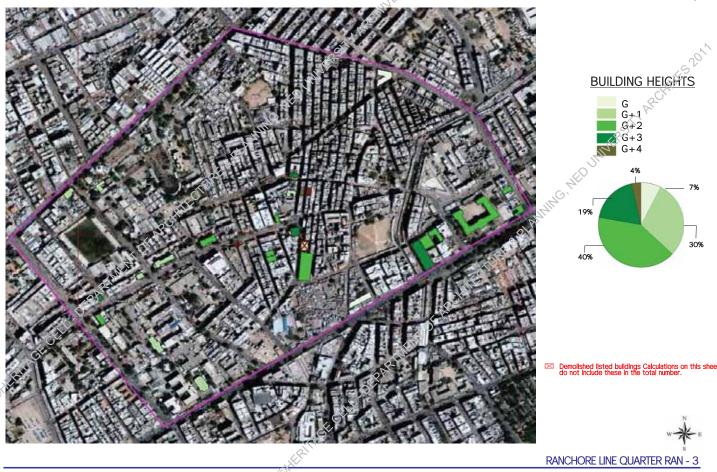

Only three buildings in this quarter come under the 'fourth degree value' (between 49-20 points). These buildings may not have architectural features but add to the character of the historic fabric and group value of the buildings.

Part II: **Inventory of Listed Heritage Buildings**

The Ranchore Line Quarter consists of a total of 29 listed heritage properties. This section of the report contains detailed inventory on each one of these buildings, including a recent photograph, enlistment number and GISTD, complete address, location map, details on number of storeys, ownership and occupancy status, present condition, architectural features and details, alterations, and an assessment for the degree of value.

Three listed buildings that have been demolished are also included in these detailed ARECULIA. THE AREAL THE CHARGE RELATIVE TO A RECEIVE REPORT OF ARCHITECTURE & FURNISHED WHITE THE CHARGE RELATIVE TO A RECEIVE REPORT OF ARCHITECTURE & FURNISHED WHITE THE CHARGE RELATIVE TO A RECEIVE RELATIVE REL inventories for the purpose of record. The evaluation on degree of value and architectural features for these buildings is done on the basis of pictures found in archival records such of Archite as newspapers and documents of National Heritage Register published by Lari Research
