

4th NED International Textile Conference -2020

Weaving a Better Future Through Innovation & Sustainability

2nd - 3rd March 2020

Textile Engineering Department
NED University of Engineering & Technology

Conference Theme

The scope of 4th NEDITC 2020 symbolizes a holistic view of the on going research and advancement throughout the global textile arena, this encompasses development of new materials and techniques and as well as improvements in the existing technologies of producing conventional and non conventional textiles. It is also envisaged that the conference will also contribute towards fulfillment of the growing demand for the exchange in info and ideas that are known to be of great importance in prevailing dynamics of the textile industry globally.

Conference Objectives

To provide a collaborative platform to leading academic scientists industrialist, researchers and research scholars to exchange and share their on going research work and practical experiences. To address current challenges and present solutions to Textile Engineering problems. Amplify the synergies between academia and industry for innovation and Textile sector development.

Target Audience

The 4th NEDITC 2020 is primarily targeted towards national and international academicians, researchers, industrial experts and delegates, representatives of professional bodies and industrial federation and as well as students pursuing their professional education in the field of textile.

Scope of the conference includes but not limited to the following topics:

- 3D-Printing
- Advanced Dyeing and Printing Technologies and Systems
- Advanced Polymers and Fibre Science and Technologies
- Coating Technology
- Garment Manufacturing
- 3D, 4D Textiles and Composite Materials
- Electro spinning
- Fashion and Design
- Advanced Finishing including Surface Modification
- Medical Textiles
- Nanotechnology
- Protective Textiles
- Green Textile Technologies
- Wearable Technologies and Smart Materials
- Yarn and Fabric Manufacturing and Value Addition Technology
- Innovation in Textile Machinery
- Modeling and Simulation in Textile
- Conventional and Novel Textile Fibers
- Geotextiles
- Automotive Textiles
- Color Science, Trends, Communication and Management
- Nonwovens
- Supply Chain Management
- Branding
- Regulatory Issues and Limitations

Important Dates

Paper Abstracts Due	15 th October, 2019
Paper Abstract Acceptance	31 st October, 2019
Final Paper & presentation Submission	20 th December, 2019
Registration Deadline	30 th January, 2020

Registrations

Category	Before 30 th January	After 30 th January
Local Participants	Rs. 2500	Rs. 3000
International Participants	\$100	\$150
Local Students	Rs. 1000	Rs. 1500
International Students	\$25	\$30
