

Airlift Technologies Vacancy Form - LIFT Associate Engineer

Copyright Company Name: Airlift Technologies
Position: Associate Software Engineer
Department: Engineering
Location: Karachi, Lahore, Islamabad

What We Offer:

Exponential Growth and Learning,

- The unique exposure to how a scalable product is built from scratch as well as see how it is used in daily life -- this offers a terrific, hands-on learning environment for those motivated to move fast and make things happen,
- The opportunity to cultivate your leadership skills -- we are extremely intentional about living the Airlift values, operating efficiently and working with the team to stay laser-focused on the mission,
- Competitive remuneration and a highly flexible work environment to enable you to flourish,
- A pathway to grow as a developer in various areas, be it as a mobile developer, backend, frontend and/or as a data engineer

Exceptional Team and Environment

- The opportunity to work alongside an exceptionally talented team, driven by empathy and a strong sense of ownership,
- An exciting and fast-paced environment and business, directly impacting the economic landscape of Asia and Africa,
- A meritocratic and rewarding culture built around core values of teamwork, growth, execution and appreciation.

Exposure to Drive Impact from Day 01

- A high-impact role in an area that is of crucial significance for the business,
- High levels of autonomy in day-to-day responsibilities and deliverable tasks,
- An opportunity to work with a global development team across Asia and Africa,
- Empowering you to lead major deployments and features within the first month at Airlift.
