

Job Title:	(Software Engineer) Java Developer	Job Grade:	3A/3B (Manager/Executive Manager)
Division:	Technology & Operations	Department:	IT Development - EasyPaisa
Line Manager:		Location	Islamabad

Position Summary:

You will be responsible for managing the interchange of data between the server and the users. Your primary focus will be the development of all server-side logic, definition, and maintenance of the central database, and ensuring high performance and responsiveness to requests from the front-end. You will also be responsible for integrating the front-end elements built by your co-workers into the application. A basic understanding of front-end technologies is therefore necessary as well.

Duties and Responsibilities:

1. Designing and developing high-volume, low-latency server-end applications for mission-critical systems and delivering high-availability and performance.
2. Contribute in all phases of the development lifecycle
3. Write well designed, testable, efficient code
4. Ensure designs are in compliance with specifications
5. Prepare and produce releases of software components
6. Support continuous improvement by investigating alternatives and technologies and presenting these for architectural review
7. Optimization of the application for maximum speed and scalability
8. Work closely with the Infrastructure, Development and Test Teams to implement the CI & CD solution

Knowledge and Experience

Education:	Bachelors/Masters of Computer Science or Software Engineering
Experience:	Experience of at least 4 - 7 years in Software Development
