

CureMD Corporation

An award winning Healthcare IT Company based out of New York City with a thriving Research & Development center in Lahore. On behalf of team CureMD, we sincerely appreciate your cooperation by partnering with us in our flagship Fellowship and YIP 2021 programs that are aimed at creating a research driven inventions ecosystem, at Pakistani universities, to make an exponential impact on the economy and society. We, at CureMD, share the vision that Industry and Academia must forge strong relationships to create an innovative and entrepreneurial ecosystem for our nation – the only catalyst to turn around our economy.

Young Inventor Program

- a. **Stage-I** of the competition consisted of three phases: (1) Phase-1 consisted of CCAT and Computational thinking tests; (2) Phase-2 consisted of Mathematical Thinking and Advanced IQ tests; and (3) Phase-3 consisted of crossword and word search problems. Only 110 candidates survived after Phase-1. Subsequently, 37 and 17 candidates survived Phase-2 and Phase-3 respectively.
- b. **Stage-II** consisted of asking selected candidates to write short and long critical essay prompts within 24 hours. All essays were checked by our YIP Committee, consisting of industry and academia experts. From this stage, we shortlisted 10 candidates who were asked to make a 3-minute life pitch video of themselves and after reviewing the video, we shortlisted candidates for the Grand Finale.
- c. **Grand Finale** consisted of again 3 phases (1) Phase-1 consisted of extempore debates; (2) Phase-2 consisted of handling unexpected crisis in real time; and (3) Phase-3 asked candidates to make a marketing pitch of their Final Year Project. Finally, we have disbursed over 2 million in scholarships and FYP funding to top candidates to support their passion.

CureMD Fellowship Program

CureMD has established a Research, Invention and Product Engineering (RIPE) committee tasked to evaluate, shortlist and recommend the best proposals among exceptional fellowship applications received from all across Pakistan. In the Phase-1, selected applicants were asked to submit detailed proposal of their research ideas. In the Phase-2, RIPE shortlisted the most innovative proposals for a pitch presentation of 10 minutes. In the Phase-3, up to 15 proposals were selected for the detailed deep dive interaction. In the Phase-4, about 10 proposals were recommended to CureMD BOD for its final approval.
