

Our team is looking for a strong Systems Engineer that can learn our platform quickly. In this position, you will be a part of a team of building the Softlogi services that will ultimately set us on our path for the future. We're seeking few candidates who are passionate about their craft, unyielding about quality and focused on our mission.

This engineer should have expertise with the technologies and tools listed below.

Required:

- C# (.NET WCF and/or Entity Framework expertise highly relevant)
- SQL Server
- MYSQL
- Visual Studio

Nice to have:

- Github
- AWS

Interested Candidates send their resumes at **[khalil@softlogi.com](mailto:khalil@softlogi.com)**, mention "Job Title" in subject line.
