Wavetec Karachi is looking for **SQA Engineer**

Requirements:

Experience: 0-6 months of Relevant Experience.

The incumbent should have skills, knowledge, and experience on the following activities:

- Identify and analyze test requirements for developing test cases and other artifacts in the testing life cycle.
- Develop scalable automation test scripts using famous languages like Java, C#, Python or VB.
- Develop a test automation framework from scratch.
- Develop test desktop, web, and mobile applications manually using different software testing techniques.
- Work within Agile scrum teams; creating and estimating tasks.
- Communicate complex technical information easily to both technical and non-technical people.
- Mentor, coach, and share best practice with a range of staff.
- Use SQL to perform testing at database level.
- Experience of tools like: Selenium Web Driver, Test Complete, Appium, Katalon Studio, Ascential Test, Jenkins, and Jira.
- Experience of using some Test/Bug reporting tools.
- Ability to escalate issues to the relevant teams in a timely manner.
