

Business Strategy Manager

IHS is looking for a Business Strategy Manager (BSM) who will accelerate the product and project portfolio strategy of its Software engineering arm. The primary requirement from the BSM is to create a vital bridge between business objectives and production capacity by supporting and ensuring the successful evaluation, development and delivery of software services.

Responsibilities

- Design the portfolio strategy to achieve the organization's vision. This can include:
 - Competitor research
 - Business case evaluation
- Lookout for new business opportunities, and evaluate the most appropriate options against team capabilities.
- Carry out budgeting & resource planning activities to ensure that team utilization is optimized.
- Align the departmental objectives with the business goals.
- Collect and analyze data from internal and external sources to look for ways to optimize resource usage.
- Help perform requirements analysis for software projects & products.
- Communicate key insights and findings to the executive team.
- Define product life cycles.
- Manage all involved stakeholders in a project / product setting.

Requirements

- Minimum Education: BS degree (Computer Science backgrounds preferred). The ideal candidate would have an MBA from a reputable institute.
- At least 3 years of experience in business analysis, management consulting or strategic planning.
- Excellent written and verbal communication skills including technical writing skills
- Excellent interpersonal skills.
- Strong organizational and planning skills. Project management experience preferred.
- Experience in analyzing data to draw business-relevant conclusions. Expertise in MS Excel or a statistical analysis software preferred.
- Familiarity with Agile software development, and experience working in the tech industry preferred.

Location

- Anywhere in Pakistan, remote work option is available.
