

Title: Community Executive Magento

We are looking for an engineering grad, who knows how to code or have basic understanding of it but is passionate more about engaging with people socially and would like to pursue a career within digital marketing.

Qualification: Bachelor's degree or above (Software Engineering / Computer Science).
Experience: 6 months – 1 Year (minimum)

Specific skills:

- Web development skills and troubleshooting – Basic to intermediate (Must)
- Exceptional oral and written communication skills (English). (Must)
- Experience writing code, contributing to, and understanding of the community mechanisms.
- Understand basic concept of digital marketing
- Analytical and data-driven mindset to build and nurture communities.
- Experience in web development or digital marketing
- Knowledge of UI and UX.

Position: Software Engineer- Python

We are hunting for a sharp software developer having expertise in Python, have more than 4 years of experience. We are working on a new product line with unique idea, it will be based on different microservices. One of the services will be on Python (Django). The app will be dockerized and use PGSQL and deploy in GCP serverless. It has all the cutting-edge technologies as we have the finalized architecture of it and you will develop it with other teams (working across the globe).

Qualification:

- Bachelor's degree in Computer Science or relevant.
- More than 4 years of experience in Python only.
- Worked on Django. Flask etc.
- Any certificates or courses in Python will be the plus point.
