# We are Hiring

## Frontend Engineer

### What are we looking for?

Apply Now

- Develop features for Data Science Dojo's web applications.
- Analyze the existing features on the websites and identify areas of improvement.
- Understand the needs of the users and add value to their experience on the websites.
- Collaborate with backend engineers and web developers to make sure that the websites are customized and optimized in the best ways.
- Develop code that meets the standards of style, responsiveness, and best practices at Data Science Dojo.
- Apply best practices for design and frontend development to ensure that the websites are responsive, usable, and useful for the audience.

#### What we like to have:

Background in software/computer science engineering with 1 - 2 years experience in frontend development with JavaScript, CSS and HTML.
