

Job Description

We are looking for an experienced senior QA engineer to oversee our quality assurance team. You will be required to oversee all aspects of software and product testing within the company. This may include developing test strategies, drawing up test documents, identifying faults, and reviewing QA reports.

To ensure success as a senior QA engineer you should have extensive experience in analytics, high-level problem-solving skills, and the ability to manage project. A top-notch senior QA engineer ensures the smooth running of the QA department and ultimately customer satisfaction.

Senior QA Engineer Responsibilities:

- Meeting with the software/product designers to determine quality assurance parameters.
- Leading the QA team in designing QA test procedures.
- Overseeing the drafting of testing documents.
- Implementing testing procedures and overseeing the QA process.
- Troubleshooting quality issues and modifying test procedures.
- Conducting analysis checks on product specifications.
- Reviewing Quality Assurance reports.
- Ensuring the successful deployment of products into the market.
- Responding to requests from the design team and management.

Senior QA Engineer Requirements:

- Bachelor's degree in computer science or relevant field.
- Previous experience as a QA engineer.
- Managerial experience preferred.
- High-level analytical skills.
- Advanced written and verbal communication skills.
- Critical thinking skills.
- Ability to manage project.
- Proficient in MS Office software.
- Detail oriented.
