Senior Software Development Engineer – CSP (Contractual)

Want to Be Our Technical Expert? Apply!

We're looking for candidates who have done BS in Computer Science and have 2-3 years' experience (preferred) in Angular/React.

Required Technical Skills:

- Ability to work in a fast-paced environment with remote teams
- Ability to adhere to scheduled and team-agreed timelines
- Experience with Angular/React, NGRX, Bootstrap UI, Angular Elements, store-based application and developed cross-platform systems
- Experience with modern CSS layout (flexbox & grid), JavaScript (ES20**), HTML, CSS

You're expected to work well independently as well as in a team and have proficiency in: programming; problem-solving; verbal and written communication; initiating self-directed effort; planning; and time-management.

Know about Your Role!

The responsibilities include but are not limited to the following:

- Work in parallel with backend software and write frontend code that meshes with backend systems to craft flexible and graceful responses to often diabolically thorny web-development challenges
- Forge new software control interfaces, data information displays, look & feel from scratch or rework older designs
- Squeeze the utmost out of browser functionality by employing and keeping current on best practices
- Optimize applications performance and moving existing code bases to latest

We are an equal opportunity employer and value diversity at our company. We do not discriminate on the basis of race, religion, color, national origin, sex, gender, age, marital status, or disability status.

Last Date to Apply: **March 01, 2022**

Interested candidates can send their CVs at **pkl_jobs@mentor.com** and mention the exact position title in the subject line.
