

BARITECHSOL

Job Description

We are looking for a Software Developer (.Net) to build software using languages and technologies of the .NET framework. You will work on existing applications, add new modules or work on a completely new product.

In this role, you should be able to write functional code with a sharp eye for spotting defects. You will develop, implement and support enterprise level solutions. You should be a team player and excellent communicator. If you are passionate about the .NET framework and software design/architecture, we'd like to meet you.

Your goal will be to work with internal teams to design, develop and maintain software.

Responsibilities

- Participate in requirements analysis
- Collaborate with internal teams to produce software design and architecture
- Write clean, scalable code using .NET programming languages
- Test and deploy applications and systems
- Revise, update, refactor and debug code
- Improve existing software
- Develop documentation throughout the software development life cycle (SDLC)
- Serve as an expert on applications and provide technical support

Requirements

- Knowledge about .NET framework, SQL Server and design/architectural patterns
- Knowledge of at least one of the .NET languages (e.g. C#, Visual Basic .NET) and HTML5/CSS3
- Understanding of Agile methodologies
- Excellent troubleshooting and communication skills
- Attention to detail
- Ability to learn in a fast-paced environment
- Strong time management skills
- BS in Computer Science
