We are in search of experienced professionals for the full-time positions of **Telephony Engineer** based in **Karachi**. The position levels include:

- 1) Junior Telephony Engineer
- 2) Senior Telephony Engineer

Job Description

- Support routine operations of the on-premise SIP based Telephony Platform (experience with either Cisco or Avaya), and Cloud communication platforms.
- Administration of user accounts, phone configuration, updates, user applications, and other related tasks.
- Monitor deployment and health of telecom circuits through strategic communication with vendors and network bodies.
- Generate monthly telecom usage reports from multiple sources.
- Assist with the testing of updates (OS, phone platform, new features, etc.).
- Create and cultivate sustainable working relationships with company clientele.
- Participates in the execution of IT projects as assigned.
- Generate reports of call research activities and log call anomalies for client.

Requirements

- BE / BS in Computer, Electronics, Telecom Engineering
- Min 2 years of experience in IT / Production Support, IP Telephony Support, Deployment or Development, Contact Center technical operations or PBX. Support.
- Must have prior experience or skills of working on any Linux OS (CentOS, Redhat, Ubuntu, Opens use etc.)
- Must have knowledge of Networks (IP, TCP, UDP, TLS)
- Strong knowledge of SIP, RTP and other signaling / media transport protocols will be an added advantage.

Interested candidates should send their resume to **hrgit@gerrys.net** mentioning **"Application for Telephony Engineer"** in the subject line.
