

Brote Technologies

Title: Software Engineer (Intern to Hire)

Number of Positions: 6

Monthly Stipend: PKR. 35000

Job type: Hybrid (On-site + Remote)

Timings: Monday to Friday, flexible giving priority to on-going studies

Duration: 3 months (extendable based on mutual consent)

WE ARE HIRING

About the position:

Brote Technologies LLC is a growing Microsoft partner have a customer base in USA, Australia, New Zealand and Saudi Arab. As a Microsoft partner we work on cutting edge Microsoft technologies including Microsoft Dynamics 365, Microsoft .Net, Microsoft Power Platform, Microsoft Azure DevOps and open source technologies including Ethereum Blockchain, ReactJS etc.

We are equal opportunity employer irrespective of religion, gender, cast or skin color.

Currently, we are looking for Software Engineer (intern to hire) to join our software development team. We are going to train the selected individuals on various Microsoft technology stack and Ethereum blockchain.

Brote Technologies is going to start soon a web3 project in the NFT space. Two of the hired interns will be trained for blockchain specific initiatives.

Requirements:

- Must have completed the pre-req courses including introduction to programming, RDBMS and data structures.
- Must have an exposure to any of the high-level object-oriented or functional programming language including (but not limited to): JavaScript/Typescript, C++, Java, C#, Kotlin, Swift etc.

Other perks:

- Company owned laptop.
- Can be offered a permanent position based up on the successful completion of the internship.
- Hybrid i.e. on-site + remote working.
