Position Title: **Project Manager**

Role Overview:

Barqtron Engineering Solutions is seeking a dynamic and results-driven Project Manager to lead high-voltage grid station and transmission line projects 132/220kV. The role involves managing full project lifecycles, coordinating with clients, consultants, and suppliers, and ensuring on-time, on-budget delivery. The ideal candidate has strong EPC experience, technical proficiency, and leadership capabilities to drive project success while upholding Barqtron's high standards in safety, quality, and performance.

Core Responsibilities:

- Manage project correspondence with clients, consultants, and internal management
- Communicate and negotiate with local and international suppliers/manufacturers
- Negotiate quotations/offers received from clients and finalize deals aligned with target pricing
- Conduct technical evaluations of suppliers in accordance with required specifications
- Prepare and submit technical submittals and obtain necessary client approvals
- Lead weekly progress meetings with clients and senior management
