'SAY NO TO CORRUPTION'

15-12-2025

Senior Android Developer
Location: Lahore, Karachi
Work Experience: 2-4 Years
Job Description
We are hiring a Mobile App Developer skilled in Android development to build, maintain, and deploy high-quality mobile applications. The role includes full-cycle Android development, Play Store submissions, compliance management, and ongoing updates.

Key Responsibilities

- Develop and maintain Android applications using Kotlin/Java.
- Manage Google Play Store deployments, approvals, certificates, signing, and release processes.
- Ensure apps comply with Google's safety, privacy, policy, legal, and upgrade requirements.
- Troubleshoot issues, optimize app performance, and ensure compatibility with the latest Android OS versions.
- Collaborate with designers, product teams, and backend developers to deliver new features.

Requirements

- 2–4 years of experience in Android development.
- Proficiency with Android SDK, Jetpack, Kotlin/Java, and Android Studio.
- Experience working with REST APIs, Git, testing frameworks, and release workflows.
- Strong understanding of Google Play Store compliance, certificates, signing processes, and build pipelines

Nice to Have

- Experience with Jetpack Compose, SwiftUI, Firebase, and CI/CD tools.
- Understanding of data protection and mobile security guidelines.

'SAY NO TO CORRUPTION'

15-12-2025

Senior Angular Developer
Location: Lahore, Islamabad

Job Description
We are seeking a highly skilled Frontend Developer with strong expertise in the Angular framework and hands-on experience with the ngx-formly library is preferred. The ideal candidate will be responsible for building scalable, user-friendly, and high-performance web applications. You will collaborate with cross-functional teams to translate business requirements into technical solutions while ensuring code quality, performance, and maintainability.

Key Responsibilities:

Frontend Development

- Develop, maintain, and optimize user-facing features using Angular (v14+).
- Implement dynamic and reusable form components using ngx-formly.
- Expertise in TypeScript, JavaScript (ES6+), HTML5, and SCSS.
- Strong understanding of Reactive Forms, validation, and dynamic UI rendering.
- Familiarity with Angular Signals (preferred but not mandatory).
- Integrate RESTful APIs and ensure seamless data flow between frontend and backend.
- Build modular, reusable UI components following best practices.
- Implement responsive, mobile-first designs and ensure cross-browser compatibility.
- Optimize application performance and bundle size.

Architecture & Code Quality

- Write clean, maintainable, and well-documented code following Angular standards.
- Utilize RxJS, Angular Signals, and state management solutions effectively where required.
- Participate in architectural discussions and contribute to best practices.
- Conduct code reviews and ensure adherence to team coding standards.

Collaboration & Communication

- Work closely with UX/UI designers to implement pixel-perfect designs.
- Collaborate with backend developers to define and consume APIs.
- Participate in Agile/Scrum ceremonies including daily stand-ups, sprint planning, and retrospectives.
- Provide technical input during requirement gathering and solution design.

Requirements

- 3+ years of professional experience in front-end development.
- Strong hands-on experience with Angular, RxJS, NgRx, and TypeScript.
- Proficiency in HTML5, CSS3/SCSS, and responsive design techniques.
- Solid understanding of RESTful APIs, JSON, and HTTP protocols.
- Experience with front-end build and packaging tools (e.g., Angular CLI, Webpack).
- Knowledge of performance optimization and browser rendering behavior.
- Strong experience using Git and participating in collaborative development.

'SAY NO TO CORRUPTION'

15-12-2025

Senior DevOps Engineer

Location: Lahore, Karachi, Islamabad

We are looking for a Senior DevOps Engineer to join our engineering team, with a strong focus on both DevOps enablement and Site Reliability Engineering (SRE) practices.

This role is ideal for individuals who thrive at the intersection of infrastructure automation, deployment orchestration, and production system reliability. You will be responsible for building, maintaining, and scaling CI/CD pipelines, containerized environments, and cloud-native infrastructure.

In addition, you'll ensure uptime, performance, and incident response of our systems, blending the delivery-centric mindset of DevOps with the reliability-driven approach of SRE.

Key Responsibilities:

- Design, build, and maintain scalable, secure, and resilient infrastructure using Docker and Kubernetes.
- Collaborate with development teams to establish CI/CD pipelines and observability standards.
- Monitor, troubleshoot, and optimize production systems with a focus on reliability and uptime (SLAs, SLOs, SLIs).
- Manage and fine-tune network configurations, firewalls, DNS, load balancers, and VPCs across environments.
- Participate in on-call rotations, incident response, root cause analysis (RCA), and postmortems.
- Ensure security compliance and best practices across the infrastructure stack.
- Contribute to documentation, runbooks, and knowledge sharing across teams.

Must-Have Qualifications:

- 2-5 years of experience in SRE, DevOps, or Cloud Infrastructure roles.
- Advanced knowledge and hands-on experience with Docker and container orchestration via Kubernetes (preferably in production environments).
- Solid understanding of networking principles, including TCP/IP, DNS, routing, NAT, VPN, and security protocols.
- Strong scripting experience (Bash, Python, Go, etc.) for automation.
- Experience with cloud platforms such as AWS, GCP, or Azure.
- Familiarity with monitoring and alerting tools like Prometheus, Grafana, ELK, or Datadog.
- Solid understanding of Git and experience with GitOps.

Nice-to-Have:

'SAY NO TO CORRUPTION'

- Certified Kubernetes Administrator (CKA) / AWS Certified DevOps Engineer / Google Professional Cloud DevOps Engineer
- Exposure to service meshes (Istio, Linkerd), Kubernetes Operators, or GitOps (ArgoCD/Flux).
- Experience with zero-downtime deployments and canary/blue-green release strategies.

Soft Skills:
- Strong communication and collaboration skills.
- Analytical thinker with a proactive, detail-oriented mindset.
- Willingness to take ownership and drive improvements end-to-end.
