'SAY NO TO CORRUPTION'

13-07-2026

POSITION NO. 1

Position: Sr. Frontend Developer Angular

Key Responsibilities

- Design, develop, and maintain scalable web applications using Angular.
- Develop responsive and user-friendly interfaces for enterprise-grade applications.
- Collaborate with backend developers, business analysts, and QA teams to deliver high-quality solutions.
- Integrate frontend applications with RESTful APIs and backend services.
- Develop reusable UI components and maintain coding standards across projects.
- Optimize application performance, scalability, and security.
- Participate in architecture discussions, code reviews, and technical planning.
- Troubleshoot and resolve frontend issues while ensuring cross-browser compatibility.
- Follow Agile/Scrum methodologies and contribute to sprint planning and estimations.

Required Skills & Experience

- 3+ years of professional experience in frontend development.
- Strong expertise in Angular (latest versions), TypeScript, JavaScript (ES6+), HTML5, and CSS3.
- Experience building Single Page Applications (SPA).
- Strong understanding of RxJS and reactive programming concepts.
- Experience with Angular Material or similar UI frameworks.
- Experience integrating REST APIs and handling authentication mechanisms (JWT/OAuth).
- Knowledge of component-based architecture and reusable UI design principles.
- Understanding of application performance optimization and lazy loading techniques.
- Experience with Git version control and collaborative development workflows.
- Familiarity with Agile/Scrum development practices.

Preferred Skills

Follow Directorate of Industrial Liaison (DIL):

Work Location: Onsite

POSITION NO. 2

Position: Software Developer (Mid-Level)

Key Responsibilities

- Develop, maintain, and enhance web-based and enterprise applications.
- Build and integrate RESTful APIs and backend services.
- Participate in the complete software development lifecycle, from requirements gathering to deployment and support.
- Collaborate with frontend developers, QA engineers, and stakeholders to deliver high-quality solutions.
- Design and optimize database structures, queries, and application performance.
- Troubleshoot, debug, and resolve software issues.
- Follow coding standards, best practices, and version control processes.
- Contribute to technical discussions and solution design.

Required Skills & Experience

- 2–3 years of professional software development experience.

'SAY NO TO CORRUPTION'

- Strong proficiency in at least one backend technology such as Python, .NET Core, Node.js, or similar.
- Experience developing and consuming RESTful APIs.
- Strong understanding of SQL databases (MySQL, PostgreSQL, SQL Server).
- Good understanding of software architecture and design principles.
- Experience with Git and collaborative development workflows.
- Familiarity with Agile/Scrum methodologies.
- Strong analytical and problem-solving skills.

Preferred Skills

- Experience with cloud platforms (AWS, Azure, or GCP).
- Familiarity with Docker and containerized deployments.
- Experience with enterprise applications such as ERP, CRM, HRMS, Service Management, or Workflow Automation systems.
- Understanding of authentication, authorization, and role-based access control (RBAC).
- Knowledge of frontend technologies and API integrations.
- Basic to intermediate experience with AI/ML concepts and Generative AI solutions.
- Familiarity with LLM integrations, AI assistants, chatbots, or automation workflows.
- Knowledge of LangChain, RAG, vector databases, or similar AI technologies will be a plus.

Education

Bachelor's degree in Computer Science, Software Engineering, Information Technology, Artificial Intelligence, or equivalent practical experience.
