'SAY NO TO CORRUPTION'

26-02-2026

WE'RE HIRING! HEAD OF INSPECTION

Head of Inspection will be responsible for leading and managing all inspection, testing, and reliability activities across refinery operations. The role ensures compliance with statutory, regulatory and corporate standards while safeguarding the integrity, safety and availability of plant equipment and facilities.

KEY RESPONSIBILITIES:

- Lead the Inspection Department and oversee inspection programs for static and rotary equipment across refinery units.
- Ensure compliance with relevant/applicable Codes & Standards (API, ASME, ASTM, NFPA and local regulatory standards) for inspection and integrity management.
- Develop and execute Risk-Based Inspection (RBI) and Reliability-Centered Maintenance (RCM) programs.
- Initiate and establish Asset Life Extension Programs.
- Review performance/Inspection reports of critical mechanical (static and rotary) equipment and recommend repair, replacement or maintenance strategies.
- Review and establish programs and procedures to ensure correct application of relevant non-destructive testing (NDT) methods including UT, RT, PT, MT, and advanced techniques.
- Ensure liaison with regulatory bodies (OGRA, Explosives Department, Boiler Inspectorate, etc.) for timely compliance and certifications of assets.
- Provide technical support during plant turnarounds, shutdowns, and emergencies.
- Ensure strict adherence to HSE and process safety standards in all inspection activities.

REQUIREMENTS:

- Bachelor's degree in mechanical engineering (Master's preferred).
- Minimum 18-20 years of relevant experience in inspection, maintenance or reliability in refinery, petrochemical or oil & gas sector with at least 5 years in a managerial role.
- Strong knowledge of international codes and standards (API, ASME, ASTM, NFPA, ISO).
- Professional certifications such as API 510, API 570, API 653. API 580 will be an added advantage.
