## WE'RE HIRING:

## IT Executive

(Systems, Integration & AI Automation)

Location: Karachi | On-site | Full-time

### ABOUT US

A fast-growing organization in the healthcare operations space is seeking an IT who can build, integrate, and automate systems. We are looking for individuals who understand technology end-to-end and can effectively connect IT solutions with business operations.

### Key Responsibilities

- Manage IT systems, infrastructure, and day-to-day technical, IT issues, chatbots, technical support.
- Work on frontend and backend integration for web-based integration for web-based internal tools.
- Develop and maintain dashboards, reporting systems, applications, and databases.
- Automate manual processes across operations, finance, and HR. Contribute to AI-driven solutions, solutions, including chatbot.

### Candidate Profile

- Strong proficiency in Excel and basic database management (SQL).
- Technical skillset including: Frontend: HTML, CSS, JavaScript | Backend: Python / Node.js / PHP | APIs and system integration.
- Exposure to AI tools, automation, and process optimization.
- Hands-on experience with chatbot development and document automation tools.

### Eligibility

Graduates in Computer Science / IT / Software Engineering from well-reputed institutions such as: FAST National University of Computer and Emerging Sciences | Institute of Business Administration (IBA) | NED University of Engineering and Technology.

Experience: Fresh to 2 years.

### Role Impact

This role plays a critical part in building and automating operational systems, directly supporting claims processing, financial workflows, and data-driven decision-making.

### Mandatory Requirement (Application Screening Criteria)

We will only consider candidates who have demonstrable project experience. Applicants must submit 3-5 projects from academic or practical work, including:

- At least one frontend and backend integrated system;
- At least one automation or AI-based project;
- GitHub profile, portfolio, or live project links.

This will form a critical part in building and automating project workflows, and data-driven decision-making.

### Application Process

Submit your CV along with project links to:
