Job Title: Software Developer

Job description

The ideal candidate should have a good understanding of the software development lifecycle and a strong eagerness to learn and grow. They will be involved in designing, coding, testing, and managing applications. Should have proficiency in coding and have an ability to test code in order to maintain high-quality code.

Responsibilities

- Design, code, test and manage a variety of applications
- Collaborate with engineering team and product team to establish best products
- Adhere to outlined standards of quality related to code and systems
- Develop automated tests and conduct performance tuning

Qualifications

- Bachelor's degree in Computer Science or relevant field

Experience

- 0–3 years of hands-on experience developing applications.
- Exposure to C# .NET, Node.js, TypeScript, and React.js (preferable).
- Familiarity with MS SQL Server and MySQL.
- Basic understanding of the full software development lifecycle.
- Experience or familiarity with agile development methodologies is a plus.

Job Type: Full-time
