WE ARE HIRING

✅ ## Specialist – Data Engineering & Reporting

- **Responsibilities:** The incumbent will lead a team of data engineers and analysts to manage data repositories, oversee ETL processes, and generate actionable health insights. The role involves developing and maintaining processes and documentation related to data management and analytics. Close collaboration with product, program, and data governance teams will be essential to align data structures with service goals and uphold regulatory standards.

- **Qualification:** Bachelor's degree in Computer Science or a related field. Master's degree preferred.

- **Experience:** At least 6 years of relevant experience, with prior work in a healthcare setup being an added advantage. S/he must demonstrate strong implementation experience in ETL, data management, reporting, and analytics. Proficiency in tools and programming languages such as SQL, Python or R, AWS or Azure, and Git is essential.

📅 Applications should be submitted latest by **September 17, 2025**.

◎ This position is based in Karachi.
