ONE WINDOW OPERATION - Industry Services Portal (Phase - I)

Background:

As a part of DIL commitment to strenthening the industry-Academia-Government nexus under the Triple Helix Model, the DIL is pursuing key initiative outlined in our Strategic Plan 2029 and as recommended during the last DIL's Leadership Conference 2024. DIL has initiated a three-phase model to achieve the objective, and the first phase of the model involved establishing a "One Window Operation - Portal System". This initiative focuses on fostering self-reliance by streaming communication and coordination with industries for collaboration. The Portal will serve as a centralized plateform to facilitate various industrial and government entities. To effectively establish this portal, we are proposing its development in Yearly Objective 2k25.

Action Plan:

Sr.No	Stage	Activity	Jan-25	Feb-25	Mar-25	Apr-25	May-25	Jun-25	Jul-25	Aug-25	Sep-25	Oct-25	Nov-25	Dec-25
1	Objective	**Define Objectives:** **1.** This initiative focuses on fostering self-reliance by streaming communication and coordination with industries for collaboration. The portal will be a centralized platform that facilitates various industrial and government entities. **2.** Facilitate industry-academia-govt collaboration for material testing, training, consultancy, R&D, and others.	Jan
